JUSTIN MEHL

mejustin@umich.edu • +1 734-673-5368 • Flint, MI / Chicago, IL

EDUCATION

University of Michigan–Flint — Flint, MI **Expected May 2027**

Bachelor of Science in Software Engineering

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, C, SQL

Tools & Technologies: Git, GitHub, Linux/Unix, Arduino, REST APIs, JSON Parsing

TECHNICAL EXPERIENCE

Kearney PERLab — Chicago, IL **June 2026 – July 2026**

Software Engineering Intern

- Engineered an automated consumer sentiment analysis tool that aggregates and processes large volumes of product reviews into clear, actionable sentiment metrics.
- Developed data pipelines to parse unstructured text data, transforming raw feedback into quantitative indicators for product evaluation.
- Optimized data ingestion and parsing workflows to enable scalable review processing across large product datasets.

PROJECTS

Plant Watering & Monitoring System | *C++, Arduino, IoT* **Jan 2025 – June 2025**

- Built an automated IoT system that monitors soil moisture and autonomously triggers watering from a central reservoir.
- Designed and implemented system software architecture, including sensor data collection, control logic, and real-time decision-making.
- Integrated wireless radio-frequency (RF) modules for real-time communication between distributed sensor nodes and a central controller.

Stock Tracker Device | *Embedded C++, REST APIs* **June 2025 – Aug 2025**

- Engineered an embedded device that fetches live financial market data via REST APIs and displays real-time ticker updates on a local display module.
- Implemented software to fetch and parse live financial data, integrating networking, data handling, and display logic on a microcontroller.
- Applied principles of embedded programming and IoT to connect physical hardware with live real-world data streams.

LEADERSHIP & OPERATIONAL EXPERIENCE

Domino's — Auburn Hills, MI **June 2019 – Jan 2023**

General Manager

- Directed daily operations of a high-volume store, managing scheduling, training, and performance for a team of 12 employees.

- Recruited and trained an entire store staff from scratch, building a high-performing team that consistently met company standards.
- Implemented staffing and scheduling strategies that reduced labor costs by 10%, directly supporting corporate efficiency goals.
- Oversaw inventory management, logistics, and customer service to ensure seamless operations in a fast-paced environment.
- Developed strong leadership, process optimization, and operational problem-solving skills in a high-responsibility role.
